MARBLE

The marvelous stones

A timeless material, used from early antiquity until today, marble is an evergreen also thanks to the immense variety of its patterns and colors.

It is suitable for both interior and exterior, it becomes more beautiful over time and needs no maintenance, thus it is the ideal material for projects that are meant to last.

Among marble producers, Iran is one of the most well-known in the world. Persepolis and the palaces built during the Achaemenid Empire bear a powerful testimony to the importance, richness and early evolution of this industry in Iran.

Today, the variety and the quality of its products, combined with fast technological improvements, make Iran one of the first players in the world for marble extraction and commerce.

Multicolor

Slab thickness: 20 mm

The pictures shown in this catalog are for illustration purpose only. All our products are natural, thus actual product will differ as color and pattern variation occur in all natural products.
